

# Augmented Images Prototype Example

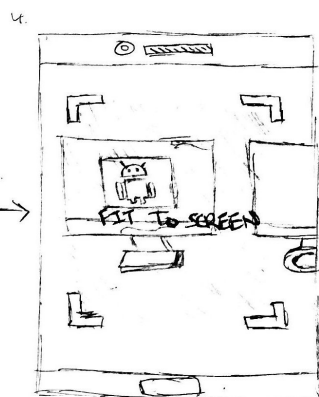

User opens their phone and clicks on the AR app

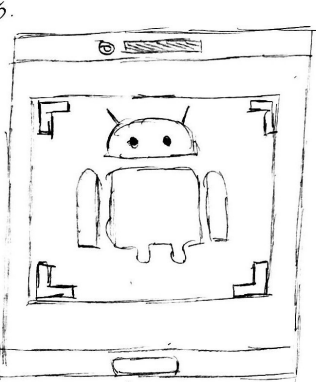

The first time the application is run, it will prompt user to allow permissions. User says YES.

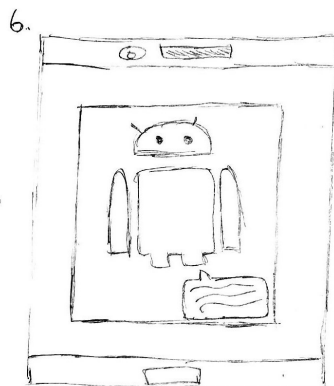

Camera shows up

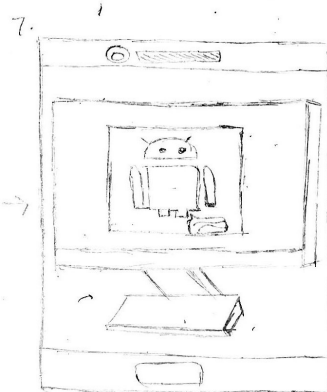

User is prompted to fit image to screen

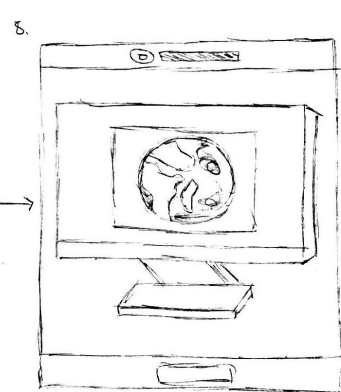

User fits image to screen

A popup appears over the image. In this case, it is an infobox hovering by the image

User moves to different angles and further back, but the infobox stays on the image

User brings up another image, and the frame disappears
